

# The Montreal Minute

Montreal, Wisconsin  
Quarterly Newsletter  
Vol 1, Issue 2  
December 15<sup>th</sup> 2021

## Hello Montreal!

So many things have happened in the past few months!

Some of you may have noticed that the inside of city building got a little facelift! In an effort to create a more inviting space for all, the interior got a fresh coat of paint and some visual inspiration, with the final finishing touches coming soon.

A big THANK YOU goes out to a group of lovely worker bees that helped me make that happen: Kelly Traczyk, Lori Genisot, Amanda & Evan Corullo, Ciara Relyea and Michaela Williams. You are all AMAZING! ❤️

### Other HAPPENINGS:

The Mayor and City Council are still working hard to find potential funding sources to assist in our quest to update and improve local infrastructure and road conditions. After further discussion with the engineering folks at MSA, it was determined that based on recent historical income data, the city would likely not qualify for the Community Development Block Grant. Instead, we are looking into a “more likely to be funded” water filtration proposal to address the high concentrations of manganese and total organic carbon levels present in our city water, which will mean cleaner water for years to come.

**REMEMBER:** Winter is a peak time for carbon monoxide poisoning. Protect yourself and your family by inspecting all fuel burning devices, cleaning out vents and fireplace flues, and check/install carbon monoxide alarms!

*Mark your calendars for the 2022 Hygge Hike at Night on February 26, 2022.*

Little known factoid: I recently learned that city of Montreal issues dog licenses! Help support the city by purchasing your pet license at the city office. \$5 for your altered furbaby and \$10 for those who are still fully intact.

## Together, we can do great things!

Until next time,

Your friendly neighborhood Councilwoman  
~Maleah Cummings
